PAPER HONEYCOMB PRODUCTS

The Natural Choice

Nature-friendly protective packaging can safeguard your products and the environment as well ... making YAMATON HONEYCOMB

YOUR NATURAL CHOICE.

PROTECTIVE PACKAGING

Yamaton Honeycomb is exceptional for protective packaging applications. Shaped by cutting, folding and gluing to protect everything from mirrors, delicate instruments, appliances, furniture, cabinets, Hi-Tech and heavy industrial components. What's more, this light, easy-on-the hands packaging, is often reusable.

Welcomed Worldwide Nature Friendly

Worldwide, national governments and corporations are limiting or banning packaging and shipping materials that have recycling and disposal problems.

Yamaton Honeycomb products are:

- Easily recyclable
- Contain recycled fiber
- Require no special disposal restrictions
- Reduced material at it's source
- Among the strongest materials per weight available
- Made from renewable resources
- Often reusable
- Lightweight, easy handling
- Clean, no fumigation needed
- Versatile - forms to function

DIE-CUT PRODUCTS

Die-cutting provides tailored protection. **Yamaton Honeycomb** can be die-cut to provide a safety cavity pack for extremely sensitive or unwieldy product designs. The combined cushioning benefits of die-cutting and **Yamaton Honeycomb** provide an unmatched safety barrier for your fragile shipments. Die-cut **Yamaton Honeycomb** is ideal for computer and Hi-Tec components, furniture, unique products, gift items and pre-assembled products with moving parts.

YAMATON HONEYCOMB PALLETS

Yamaton Honeycomb pallets give you a new option for pelletized shipments. Our block, runner-style or wrapped pallets provide a light weight alternative to wooden pallets. **Yamaton Honeycomb pallets** are strong, lightweight, custom designed, and made of recyclable paper. Your product will never be damaged by nails and wood pallet splinters.

PALLETS WITH PLASTIC LEGS

The plastic legs are removable and reusable. Telescoping honeycomb board and legs allowing stacks of up to 50 pallets instead of 20 wooden pallets in regular stacks.

APPLIANCE AND FURNITURE PACKAGING

Packaging designed around your present appliance and furniture packaging. **Yamaton Honeycomb** is easily customized to fit your shipment needs. **Yamaton Honeycomb** partitions and cubes can hold products safely in place without wood.

The **Clear - View - Pack** forms a superior packaging system. Rigid **Yamaton Honeycomb** protects vulnerable edges from damage while the stretch film overwrap keeps out dust, grease and moisture.

FILL - THE - GAP PANELS

Filler panels hold loads in place. Ideal for protecting products in rail cars, marine containers or trucks. In addition, Separator panels provide lightweight protection for printed and paper materials, glass, batteries, chemicals, irrigation equipment, and other products.

VOID FILLERS

Stabilize your shipments. Uneven or partial shipments can create a shipping nightmare. Use **Yamaton Honeycomb Void Fillers** to protect your products from damage. Utilize our lightweight panels to fill voids in shipping cartons or to stabilize pallet shipments.

SLABS FOR FOUNDATION FLOORS AND BEAMS

Used on "Clay" hard soils to prevent the effects of soil movement. Once the concrete hardens the honeycomb slabs disintegrate and an empty space is formed, creating a isolated space between the concrete and the ground. Replaces Expanded Polystyrene (EPS).

CORE MATERIALS FOR DOORS

Yamaton Honeycomb is a core material for the door industry, used to fill inside doors **Yamaton Honeycomb** cells have a high strength/weight ratio, determined by the variable cell diameter. Yamaton has several **expanding machines** for automatic and mechanical processing.
